FCST-CR120-CRS Horizontal Cross

The horizontal cross for fiber optic raceways is a core connecting component in fiber optic cabling systems, designed to facilitate four-way intersections and convergence. It connects horizontal raceways from four directions, managing the intersection, branching, and convergence of backbone and branch fiber optic cables, and serves as a key node in constructing complex, grid-like routing networks.

- Easy to install and highly adaptable.
- Compliant with the UL94-V0 fire safety standard.
- Sturdy structure with excellent load-bearing capacity.
- For 120mm fiber optic raceways; horizontal cross-connection.

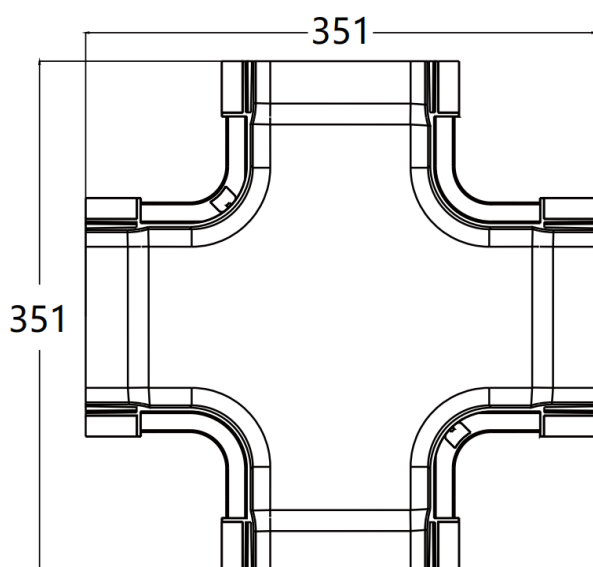

Product Specifications

Construction	Description
Material	ABS
Flame-retardant Rating	V0
Packaging	9PCS/CNT 5.76KG
Weight	640g

Product Structure

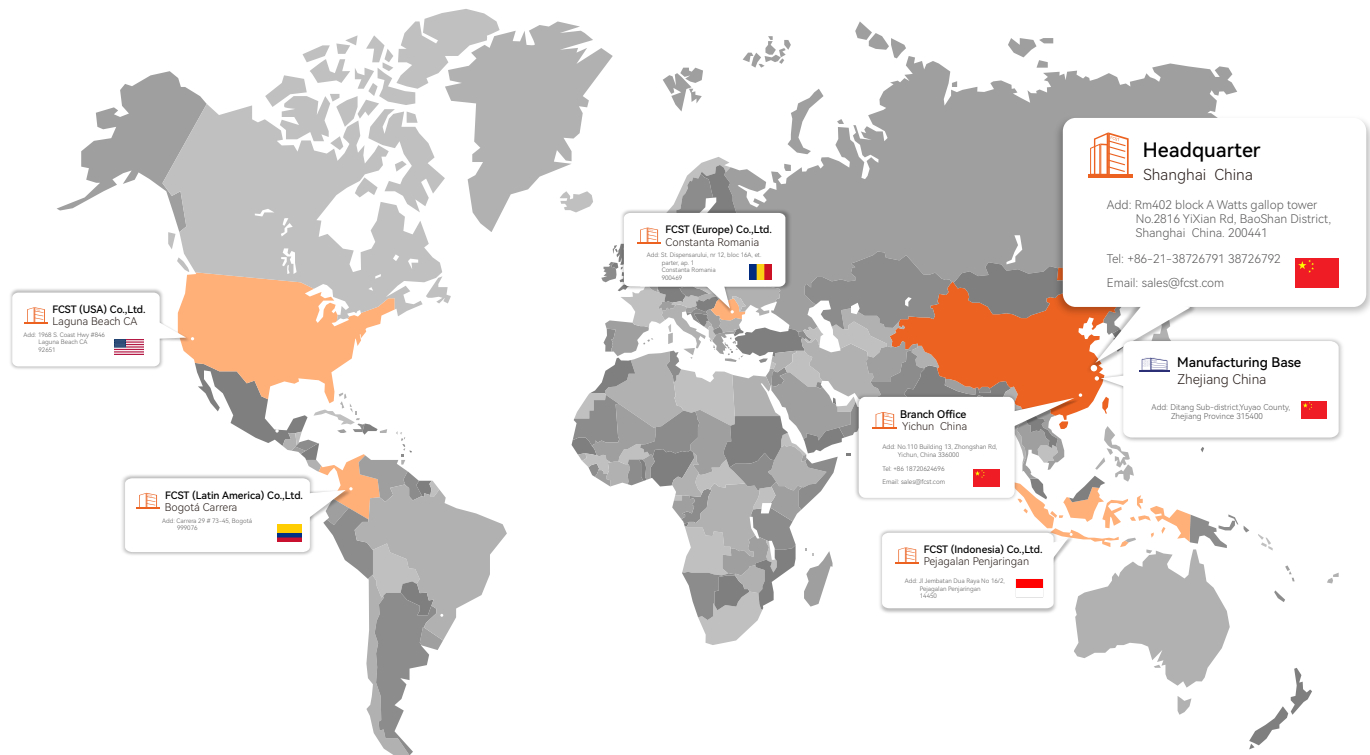

Unit:mm

Better FTTx, Better Life.

Fiber Cable Solution Technology Co.,Ltd.

FCST - Better FTTx, Better Life.

At FCST, we manufacture top-quality microduct connectors, microduct closure, telecom manhole chambers and fiber splice boxes since 2003. Our products boast superior resistance to failure, corrosion, and deposits, and are designed for high performance in extreme temperatures. We prioritize sustainability with mechanical couplers and long-lasting durability.

FCST aspires to a more connected world, believing everyone deserves access to high-speed broadband. We're dedicated to expanding globally, evolving our products, and tackling modern challenges with innovative solutions. As technology advances and connects billions more devices, FCST helps developing regions leapfrog outdated technologies with sustainable solutions, evolving from a small company to a global leader in future fiber cable needs.
